

“What is Your Highest Possibility?”

Since the moment of your conception, you were a miracle! Two tiny cells created the blueprint for who you are today. Your body's Innate Intelligence differentiated these cells into highly specialized *heart, lung, or eye* cells helping you to become a unique human being in the world.

This process was perfectly timed and orchestrated by your “Innate Intelligence” which knew exactly what you needed at exactly the right time to keep you growing and healthy. This Innate Intelligence remains within you until the last breath of life leaves your body!

This same intelligence that told your fingers and toes how to grow in perfect proportion to the rest of your body *will work to keep* your body as healthy as possible. As long as there is *no interference* with its communication to every cell, this Innate Intelligence knows the exact right amount of chemicals and enzymes to release, *and when to release them*, in order to keep your body functioning in perfect harmony.

What would happen if this intelligence, filled with vital life messages, could not reach the proper destination at the proper time? What if this interference blocked messages that helped your *heart, lungs, liver or kidneys function properly*? What if your sexual organs and hormonal system were blocked? Do you think this would cause you to live your life at **less** than your highest potential? Of course it would! According to Deepak Chopra, M.D., “All disease results from a disruption of the flow of intelligence.” Interference to the flow of intelligence, when it happens in the spine, is called a *vertebral subluxation*. Spinal bones become misaligned and interfere with the transmission of nerve supply, your body's intelligence, as it passes from your brain to every cell and back again.

Chiropractic adjustments remove these subluxations that interfere with your body's Innate Intelligence and restore your natural ability to heal and be healthy. Ask yourself what would be possible for you and your family if you lived your entire lifetime free from interference and subluxations. When there is no interference, *athletes perform better, artists are more creative, and people adapt better to daily stress enabling them to function better in the world.*

Parents also report that children, who are under regular chiropractic care, get sick less frequently and need significantly less medication throughout their lives. Senior citizens, who utilize chiropractic care, experienced a 15% lower admission rate to nursing homes.¹ *Ask your chiropractor today what the possibilities would be for you and your family. You deserve to find out!* 1. “Topics in Clinical Chiropractic”, June 1996 study by the Rand Corporation.
